ADDITIONAL COMMENTS OR SPECIAL MODIFICATIONS:

PLEASE READ AND SIGN:

By signing, the customer agrees that their vehicle is their own property, insured and their own responsibility. The customer accepts all risks associated with ECU tuning and the use of a dynamometer and will not hold STM Tuned Inc or any employees or any off-site business location responsible if their motor blows up, a strap breaks, the dyno breaks, the zombies attack, an alien spacecraft launches an assault and damages the car or if any other similar or outrageous event takes place while tuning.

Modifying a vehicle for street use is illegal in most states. The customer certifies their vehicle is not driven on public roads where such acts may be illegal or is for competition track use only. Modifying a vehicle beyond factory power levels can result with engine damage. You attest that your vehicle is in safe, working condition with no leaks or other hazards that may render the use of a dynamometer dangerous.

We reserve the right to deny ANY car for ANY reason. Our main concern is safety. If you have stretched tires, WE WILL NOT PUT YOUR CAR ON A DYNO. If the vehicle requires additional services or labor to continue properly with the tune, the customer will be responsible for any additional costs. An 8% New York State Tax will be added to all in-house work.
